After the introduction, players are placed into small teams, and the game begins with a simplified first race to get everyone familiar with the gameplay. From there, it's off to the races! Each round starts with an overview of the track conditions, followed by a four-minute action phase where teams strategise in their breakout rooms. During this phase, a live market on-screen shows fluctuating payouts for the horses based on player actions. Will you jump in early and grab a great price, or bide your time and make your move at the last second?

Once the decisions are locked in, teams come back together to watch the race unfold live. Expect cheers, groans, and plenty of excitement as the winning horses cross the finish line. After the results are announced, a brief celebration (and maybe a little taunting!) leads right into the next race, where teams adjust their strategies and try again.
